🧠 TECHNICAL SKILLS

Html • CSS • JAVASCRIPT • Python • AWS • Java • React.js

📁 PROJECTS

03/2021 – 04/2022

Bone Age Prediction from X Ray Image Using Convolutional Neural Network
Developed an application that uses CNN in Python to improve the accuracy in Predict Bone Age from X-Ray Image and trained the machine using images to improve the performance

07/2023 – 07/2023

Expense tracker
- The Expense Tracker React application you are going to build going to contain two input fields that will contain the expense cause or the name of the expense and the amount of that expense.
- Build an Expense Tracker app with React Hooks and LocalStorage API.

07/2023 – 07/2023

Shopping cart application
- Context API with useReducer Hook for State Management.
- In Hooks I have used createContext and useContext.
- The application will allow users to create a shopping cart and add items to it.
- The user will be able to view items in their cart, change the number of items, and delete items.
- The application will also provide a summary of the total cost of items in the cart.
